

30th June 2020

## REACH

As you will be aware the REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals ) regulation has reached the registration stage process. This mail is for the purpose of updating Star Foils S.r.l.'s position and actions to date regarding this process.

Currently all chemicals used in the manufacture of C11 that exceed the 1 tonne imported threshold have now been completely registered

None of these chemicals are contained in C11 on the current REACH SVHC (Substances of very High Concern) candidate list up to and including the amendments dated June 2020.
