10th July 2018

REACH

As you will be aware the REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) regulation has reached the registration stage process. This mail is for the purpose of **Star Foils's** position and actions to date regarding this process.

Currently all chemicals used in the manufacture of the **C12** that exceed the 1 tonne imported threshold have now been completely registered

None of these chemicals are contained in the **C12** on the current REACH SVHC (Substances of very High Concern) candidate list up to and including the amendments dated June 2018.

Salvatore Rinaldi
General Manager
